

Borrow library books with your Nook

NOOK

Borrowing eBooks to read on your Nook is simple. First, you'll need to download and install free software on your computer. Next, you'll choose eBooks from the collection, check them out and download them. Finally, you'll transfer the eBooks from your computer to your Nook. Before you begin, make sure you have your library card, because you'll need your account number.

1. Visit our web site: www.seymourlibrary.org . Look in the right column, under the heading "Library links," and click the "Digital downloads" link.
2. Scroll down the page, to the bottom of the right-hand column. Under the heading "Digital Software," click on the "Adobe Digital Editions" link. You'll need to install Adobe Digital Editions, a free software program, to download eBooks from this site.
3. Install Adobe Digital Editions. You'll be prompted to enter your e-mail address and a password. If you have never signed up before, click the link to sign up. (Although you'll be offered the opportunity to use the software without providing an e-mail, you need to register with an e-mail address to transfer downloaded books to your Nook.)
4. Find an eBook you want on the Digital Downloads/Overdrive site. Click on either the Adobe EPUB eBook or Adobe PDF eBook and add it to your cart. (The EPUB format enables you to change the font, resize the text and make other modifications to make eBooks easier to read on small screens. The PDF format preserves the layout of complex documents.)
5. Click on "Proceed to Checkout." Enter your library card number (including the D) with no spaces. Enter your four digit PIN. Select a loan period from the drop down list (7, 14 or 21 days) and click on Confirm Checkout.
6. Click on "Download," and **it** should appear in Adobe Digital Editions.
7. Once you see the book is available, plug your Nook into the computer using the USB cable the Nook came with. (You will be asked if you want to see the files, but you don't need to see them.)
8. You should see the Nook listed on the left side at the bottom of the Adobe Digital Editions window. If you don't see the Nook listed, click on Library View at the top left-hand side. You will be asked to authorize the Nook the first time you connect it to your computer when Adobe Digital Editions is open. (You must authorize your Nook with Adobe Digital Editions software to be able to transfer and read eBooks.)
9. Once you see your book on the right-hand side and the Nook listed on the bottom left-hand side, click on the book and drag it to the Nook. Wait until it is fully copied, as indicated by the progress bar.
10. Disconnect your Nook, following the appropriate steps to eject it. eBooks that are transferred in this manner to your Nook will be located in the MY DOCUMENTS folder under the MY LIBRARY menu item.
